

MPR 2000

Next-generation multi-purpose rigid bomb

The MPR 2000 (2000 lb) is part of a combat-proven family of rigid general-purpose (GP) bombs. Based on the excellent results gained by the MPR 500, the MPR 2000 delivers high reliability of more than 95% with low target engagement cost.

High reliability for maximum lethality

MPR 2000 delivers high penetration capabilities. No "J" effect enables a straight penetration path to the target. The MPR 2000 GP bomb is capable of penetrating 2.5m reinforced concrete. It is fully compatible with the MK 84 general-purpose bomb in aircraft configuration, guidance kits and fuzes.

MPR 2000

Next-generation multi-purpose rigid bomb

Key Benefits

- Penetration capabilities: 2.5m reinforced concrete
- High kill probability
- Over 95% reliability
- Low collateral damage
- Low target engagement cost
- Fully protected fuze

Key Features

- Full compatibility MK 84
- No “J” effect
- Controlled fragmentation
